San Francisco Senior Project Manager – Healthcare

The San Francisco office of Perkins Eastman, a leading international architecture firm, is seeking an architect with a minimum of 15 years experience to manage all phases of significant (\$100 million+) healthcare planning and design projects. Recognition of the competing needs of two dimensional space planning with three dimensional form giving is essential as is a demonstrated ability to balance those competing needs. Successful candidates will combine superb managerial (team and people) skills with in-depth technical understanding and superior design sensitivity. The skills to manage client expectations are required as is prior experience leading large, complex consultant teams. LEED accreditation is also preferred, while some experience with international, research, higher education and/or Federal projects would be a plus. Candidates should possess at least a BArch and appropriate registrations. An MArch or other advanced degree is also a plus. Proficiency in AutoCAD, Revit and other project related softwares is desired.

Perkins Eastman is an Equal Opportunity/Affirmative Action Employer.

San Francisco Senior Medical Planner

The San Francisco office has an opening for a Senior Medical Planner with a minimum of 15 years experience in hospital planning and design. A key member of Perkins Eastman's firm wide Healthcare Leadership Group, the Senior Medical Planner will provide leadership in healthcare planning, programming, medical equipment coordination, and user interface. An understanding of FGI Guidelines and demonstrated skills in both preparing and presenting complete planning documentation from strategic facility planning through CD's is required. While a range of facility types and sizes is acceptable, prior experience on multiple large scale projects (\$100 million+) is desired as is a demonstrated ability to think holistically and three dimensionally about space planning. Respondents should possess a BA Degree or greater in Architecture with appropriate licenses and registrations. Other experience backgrounds will also be considered (RN, PE with owner side facilities experience, etc.) if that experience has provided the respondent with the planning and design skills we require. Candidates should be proficient in various MS Office programs, and some proficiency in AutoCAD, ADT, and Revit would be a plus.
